

Greetings...

Attached is an entry form for the Autospectacular on 16<sup>th</sup> September 2017. Please action it promptly so you don't miss out.

In line with overseas practice we have introduced a new condition that all cars be equipped with a fire extinguisher. It is to be placed behind and touching the left front wheel. This position ensures it is not visually intrusive but everyone knows exactly where it will be.

The rationale for this requirement is that although most classic cars carry a fire extinguisher bystanders would not know where it is in an emergency such as an electrical or fuel system fire. During Friday night a security guard is constantly patrolling but cannot be expected to carry the Edgar Centre's heavy extinguisher with him. Clearly, a fire extinguisher in a known position by every car gives us the best chance of avoiding a catastrophe. This requirement does not apply to motorcycles.

A second condition of entry is that all cars must be left unlocked, for the obvious reason of quick access to fight an interior fire.

These two requirements are in all entrants' best interests and will be strictly enforced. If you do not agree with them, do not enter.

Please make sure your fellow club members are aware of these conditions.

Kind regards

Kevin Casey

Chairman
